

## Stucchi Transparency: A new revolution in the World of Lighting Industry.

Do you know that light up to 5% is being absorbed or obstructed by Lamp holder depending on the type of fixture?

Therefore, controlling this factor can result in reduced number of fixtures and thereby huge savings.

**Thanks to innovative Stucchi's transparency** which represents a new revolution in the world of lamp holders and brings in lot of inherited advantages:

- ❑ **For Lighting** ~ NO DARK SPOTS. Perfect answer to “dark spots” in case of indirect lighting.
- ❑ **For Environment** ~ No additive and hence reduces the environmental impact.
- ❑ **For Quality & Wiring** ~ Everything including contacts can be easily checked and monitored.
- ❑ **For Design** ~In line with the trends of contemporary aesthetics, transparency grants a new aspect to an object considered exclusively technical.
- ❑ **For Automatic Wiring Machine** ~ Transparency simplifies the automatic wiring machine set-up and the optimization of the productive performances.
